

## UNIFORM FEATURES / DETAILS

<p><b>ANTIMICROBIAL</b></p>	<p>Textiles provide an ideal surface for harboring viruses and bacteria which are re-transmitted from the textile (eg. contact with other surface). Our fabrics actively inhibit viruses and kill bacteria upon contact on the surface. By keeping the textile free of viable viruses and bacteria, produced uniform minimizes the potential for re-transmission of pathogens from textiles. To avoid this problem. we treated Silver-ion (Anti-microbial)coatings on our garments. The final product is tested based on <b>ISO18184 (Determination of antiviral activity of textile products)</b> in Gmicro testing lab in 01.04.2020 (<b>Report no: 2020FM03839R06</b>). <b>ASTM E2149 (Determining The Antimicrobial Activity Of Immobilized Antimicrobial Agents Under Dynamic Contact Conditions)</b> standards, and <b>ISO20743 (test method of determination of anti-bacterial activity of textile product)</b> tests are done on EKOTEKS in 13.07.2020 with the result of %99.99(<b>Report no: 20022950</b>). Our textiles are tested on <b>ASTM E2149</b> in Bursa Uludag University in 21.02.2020 (<b>Report no: 20200221-01</b>). ‘Viral stability and persistence of Sars-CoV2-on treated material’ test is accomplished in Doherty insititute in Melbourne with the result of %99.98 for reduction of viruse in 30 minutes contact time and %99.99 for reduction of viruse for 120 min contact time.</p>
<p><b>LONGTIME WASH WARRANTY</b></p>	<p>Intelligent and innovative manner of our new technology for our fabrics, economically opens new fresh dimensions. Therefore the effect is not only financial, also indirect ecological effects during washing. Our garment products are tested based on <b>ASTM E2149 -01 ( Determining The Antimicrobial Activity Of Immobilized Antimicrobial Agents Under Dynamic Contact Conditions)</b> standard and washed 100 times in 60°C result in keeping anti-microbial specialty.</p>
<p><b>HEALTHY &amp; COMFORT</b></p>	<p>Our product made from 97% cotton which is naturally safest material, good for the body and tested based on <b>GOTS 5.0 (Global Organic Textile Standard)</b>, <b>OCS 2.0 (Organic Contents Standard)</b> and <b>OEKO STD 100 ( OEKO-TEX STANDARD 100)</b> standards.</p>
<p><b>BREATHABLE</b></p>	<p>Our cotton fabrics level of the breathability is an essential contributing property to thermal and physiological comfort of garments. Fabrics which have the ability of allow moisture vapour to pass through them provides comfort all day long. Our garments are tested based on <b>OEKO STD 100 ( OEKO-TEX STANDARD 100)</b> standard.</p>
<p><b>SKIN FRIENDLY</b></p>	<p>Our uniforms which are tested based on: <b>OEKO STD 100 ( OEKO-TEX STANDARD 100)</b> and <b>OCS 2.0 (Organic Content Standard)</b> standards, that is not harmful for the human body,they are created from textile which is suitable for sensitive skin based on the international standards.</p>

<p><b>ANTI-ODOR</b></p>	<p>Microorganisms, such as odor-causing bacteria, require certain pre-conditions, such as food, temperature, surfaces that are as large as possible and, above all, moisture. This is why textiles worn next to the skin are especially ideal biospheres for microorganisms. Anty-odor technology captures odor molecules and keep products smelling fresh. Our products are tested based on <b>OEKO STD 100 ( OEKO-TEX STANDARD 100)</b> standard, unpleasant odor are keep control and crews will stay fresh throughout daily activities.</p>
<p><b>ANTI-PILLING</b></p>	<p>Our uniforms will be treated during the manufacturing process in order to reduce their propensity to pilling.</p>
<p><b>SOIL &amp; CLEANING PROCESS RELEASE</b></p>	<p>Natural fibres such as cotton and wool exhibit little soil repellency, but when they do become soiled they are readily cleaned, as they exhibit a high level of soil releasability. Cotton is not a hydrophobic fiber, rather it absorbs water quite well. Consequently, garments made with this fiber does not need soil release polymers.</p>
<p><b>SLIM FIT &amp; BODY SENSE</b></p>	<p>Slim fit, improves posture and provides a slimmer appearance. It's designed with comfortable materials that make it invisible under clothing. The materials are comfortable, letting you wear it all day long. Our Design included feels just like a part of your skin because it adapts to you body, giving your more comfort. the threads is thinner, so the fabric is more elastic and doesn't lose its shape in the wash.</p>
<p><b>SUSTAINABILITY</b></p>	<p>For the future of our world, as Keyvan Aviation, we place great importance on recycling. Therefore, we take care to use sustainable materials in our products. Accordingly, the pros of our uniforms and product made with organically grown fibres, such as organic cotton. Our garments are tested based on <b>RCS 2,0 (Recycled Claim Standard)</b> and <b>GRS 4.0 (Global Recycled Standard)</b> standards.</p>
